Beyond an Hour of Code: Computer Science for All Grade Levels/Content Areas

California's first ever Computer Science Standards have been released. The standards were written to be accessible to each and every student in California, grades K-12. Join us for this full day workshop as we explore the Computer Science Standards and accompanying documents. Topics will include vision, issues of equity, definition of computer science, standards progressions, credentialing, concepts and practices, guide for leaders, implementation options, instructional practice guides, interdisciplinary and CTE connections, and an opportunity to experience hands-on CS standards-based lessons.
