

Improvement Science 101

This two-day interactive workshop is designed to give individuals a hands-on introduction to the tools and principles of improvement science. Participants will learn how to apply continuous improvement habits, methods, and tools to solve pervasive problems of practice in an educational context.

Participants will learn an overview of continuous improvement including:

- Identify the problem
- Apply data analysis and equity protocols
- Investigate the root cause
- Develop a theory for improvement
- Test change ideas using disciplined inquiry (PDSA)
- Measure the impact
- Scale your efforts
