Accelerating Learning: Improving Math Intervention

Join us as we explore ways to transform your approach to math intervention. Equip yourself with the skills and knowledge to accelerate learning, build students' confidence, and help them achieve their full mathematical potential. Don't miss this opportunity to learn about evidence-based strategies to support intervention in mathematics in a whole class or small group setting.

Together we will...

- Discover the value of learning acceleration by gaining insights into the principles and benefits over traditional remediation methods
- Explore evidence-based strategies tailored to meet diverse needs
- Learn to leverage assessment data to identify key areas for intervention and monitor student progress
- Investigate how to leverage students' strength to develop purposeful scaffolding and build toward grade-level content

The book, *Meaningful Small Groups in Math - Grades K-5* by

Kimberly Rimbey,
will be provided.
