California Mathematics Frameworks Teaching to Big Ideas

The 2023 Mathematics Framework serves as guidance for school districts and educators on ways to align classroom instruction with the demands of the standards. California's vision of mathematics instruction seeks to position all students as mathematically capable.

In our full-day session, we will engage with administrators, leaders, and teachers across the county to:

- Explore the big ideas of the 2023 Mathematics Frameworks
- Discuss implications for instructional shifts and the instructional materials needed to best support our students
- Determine next steps for your district, school, and classroom in spreading awareness of the framework

Mathematics Framework
