Cognitively Guided Instruction (CGI) Level 1

Join this four-session workshop to deepen your understanding of CGI and apply it directly in your classroom. This workshop is ideal for teachers looking to transition to student-centered, inquiry-based math instruction.

Together we will:

Session #1 & #2: Understanding CGI's Theory

- Explore the research behind CGI, discuss problem types and solution strategies, and how children develop mathematical thinking.
- Learn how to assess and respond to students' mathematical reasoning.

Session #3 & #4: Integrated CGI Implementation

- Collaborate to design and implement a CGI-aligned lesson with students using counting collections and addition & subtraction problem types.
- Reflect on student thinking and refine instructional approaches based on observations to plan next steps.

The book, *Children's Mathematics: Cognitively Guided Instruction* will be provided.

Session #1	Session #2	Session #3	Session #4
July 22, 2025	July 23, 2025	October 23, 2025	March 10, 2026
