Enhancing Access for Multilingual Learners in Math

In this interactive workshop, participants will engage in learning experiences designed to deepen their understanding of how to create language-rich and inclusive mathematics classrooms. Educators will develop instructional practices that amplify students' mathematical language and positively position multilingual learners as capable.

What We'll Dive Into

- Reflect on your current attitudes, beliefs, and teaching practices — consider how they impact student engagement, participation, and identity in math
- Learn about Math Language Routines (MLRs) that support student talk, language development, and deeper understanding
- Explore tools and strategies to make math more accessible, equitable, and inclusive — especially for multilingual learners
- Collaborate with peers to plan realistic, actionable next steps for your own classroom

August 21, 2025	January 22, 2026
OMS Registration: https://tulare.k12oms.org/147-266859	OMS Registration: https://tulare.k12oms.org/147-266923

Note: Both sessions will cover the same content.
